

# PureGrade Liquid Plant Food

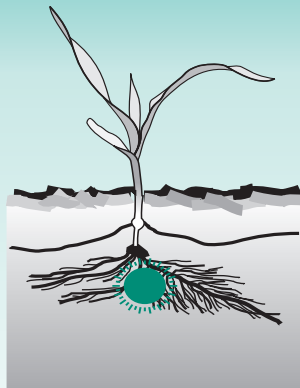

## Use RGS® Root Growth Stimulator with GoldStart™ 6-24-6

RGS® is a post-patent, zinc ammine acetate chemically identical to ACA®

Add the root building power of RGS Root Growth Stimulator to row-placed starter fertilizers like GoldStart 6-24-6 on corn and milo this planting season. RGS is a synergistic formulation of zinc and ammonium acetate that stimulates the plant to produce more root volume at a faster rate. This results in a plant with more vigor and greater stress tolerance that produces higher yields and higher profits.

RGS is easy to apply in the seed furrow with GoldStart 6-24-6. Just follow the label instructions for mixing with liquid fertilizers. The band rate is only 5 ounces per acre making for a very economical program.

GoldStart 6-24-6 is one of our most popular and safest seed placed starter fertilizers. 6-24-6 has only about one-half the salt index of 10-34-0, while supplying needed potassium. 6-24-6 is an excellent carrier for RGS.

**Stronger Brace Roots**

**Faster Plant Growth**

**Improves Crop Standability**

**Higher Yields**

**Greater Resistance to Stress**

**Increased Stalk Diameter & Strength**

**For maximum root volume that makes the most of available soil moisture and nutrients use RGS Root Growth Stimulator.**

### RGS® Specifications

- GUARANTEED ANALYSIS -

Total Nitrogen (N) .....	15.0%
% Ammoniacal Nitrogen .....	15.0%
Zinc (Zn) .....	17.0%
Derived from ammonia and zinc oxide.	

- PROPERTIES -

Specific Gravity .....	1.265
Weight per gallon .....	10.55
Gallons per ton .....	189

"I used RGS for the first time in 2001. I put it in my liquid starter when I planted. Growing conditions were far from the best last year, but I raised the best corn I've ever had. I give a lot of the credit to Nulex's **RGS Root Growth Stimulator**.

— Don Rust, Rust Farms • Southeast North Dakota

"I put **RGS** in my liquid starter fertilizer last spring. It was easy to use and mixed easily. I am convinced that **RGS Root Growth Stimulator** helped me raise some of the best corn on some of my poorer ground."

— Rick Patterson, grower • Western Iowa

"I have sold other products that enhance root growth, but none have performed any better, or been as economical for my farmer customers to use as **RGS Root Growth Stimulator**.

— Tom Reif, Chester Farm Service • Eastern South Dakota

**RGS® Root Growth Stimulator is manufactured by Nulex, Inc.**

**Phone 800-831-4815**

**Available in 2x2.5- gallon jugs or 30-gallon drums.**
