

Application Recommendations*

3rd to 6th Trifoliolate:

Apply 3 to 4 gallons per acre of a Nutra-Flo PureGrade Liquid Plant Food. Important micronutrients to consider adding are:

- Manganese to encourage nodulation and mediate glyphosate toxicity.
- Magnesium and Boron to encourage pollen germination.

Beginning Pod (R3):

Apply 3 to 4 gallons per acre of a Nutra-Flo PureGrade Liquid Plant Food. Important micronutrients to consider adding are:

- Manganese to encourage nodulation and mediate glyphosate toxicity.
- Magnesium and Boron to encourage pollen germination.

Pod Fill:

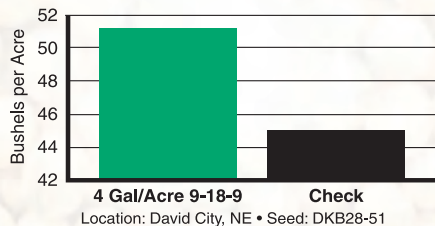

Use a Nutra-Flo high-nitrogen grade with sulfur during pod fill to provide sufficient amounts of nitrogen.

- The use of surfactants and spreaders may enhance leaf coverage and increase plant uptake.

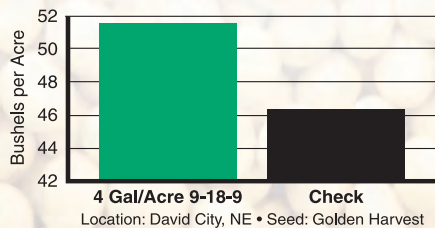

*Foliar programs vary. Use local guidelines for best application time.

Soybean Foliar Fertilizer Research

5.7 Bushels/Acre Yield Increase from Foliar Fertilization with 9-18-9!

5.4 Bushels/Acre Yield Increase from Foliar Fertilization with 9-18-9!

Use as a Starter:

Band 3 to 6 gallons/acre near the seed furrow.

FAST FOOD for Soybeans!

Supplies Nutrients *Fast* When Soybeans Need Them Most

Nutra-Flo PureGrade Liquid Plant Food is an efficient and economical way to give soybeans an extra boost towards maximum yields when growing conditions are good. And, it ensures important nutrients are available during critical growth stages when poor soil conditions limit the amount of nutrient uptake.

Only a Small Amount is Needed to Increase Yields

Only a small amount of Nutra-Flo PureGrade Liquid Plant Food (3 to 4 gallons/acre) is needed for a quick plant response. Research shows that soybean leaves absorb one-half of the nitrogen and potassium in as little time as 2 to 10 hours.

Will Not Rust Equipment

Nutra-Flo PureGrade Liquid Plant Food is chloride-free with a low salt index and neutral pH. Expensive application equipment stays looking like new – virtually free of rust and corrosion.

Lower Costs, Higher Yields

Nutra-Flo PureGrade Liquid Plant Food can be piggy-backed with most post-emerge chemicals. It makes economic sense to combine applications. You'll enjoy these added economic benefits when foliar feeding Nutra-Flo PureGrade products.

- Higher protein levels
- Increased disease resistance
- Jump start metabolic activity
- More drought resistance
- Fast nutrient uptake
- Increased root growth
- Overcome glyphosate-caused manganese deficiency

GoldStart Liquid Plant Food

A low-salt fertilizer high in orthophosphates formulated for safe foliar application.

Available in: 9-18-9, 5-15-15, 6-24-6, 3-18-18 & 10-10-10.

Diamond Liquid Plant Food

A 100% orthophosphate fertilizer designed for safe foliar application.

Available in: 9-18-9, 3-18-18 & 10-10-10 & 5-15-15.

Nutra-Flo PureGrade Liquid Plant Food is designed for foliar application

- 100% nutrient availability
- A clear, true solution
- Compatible with most post-emerge chemicals
- Virtually non-corrosive
- Trouble-free

100% Water Soluble

Nutra-Flo uses 100% water soluble ingredients. No solid materials are suspended in liquid. You're assured of a homogeneous mixture with equal analysis in every drop.

Low Salt Index

Nutra-Flo PureGrade Liquid Plant Food has a low salt index to minimize leaf burn when foliar-applied.

Chloride-Free

To ensure plant safety, Nutra-Flo uses potassium hydroxide, a potash source completely free of chloride.

Neutral pH

Nutra-Flo PureGrade Liquid Plant Food maintains a near-neutral pH for optimum growing conditions and safety.

Virtually No Heavy Metals

Nutra-Flo is a leader in manufacturing environment-friendly fertilizers that are extremely low in heavy metals.
