

Nutra-Flo® PureGrade® Liquid Plant Food

APPLICATION RECOMMENDATIONS*

—STARTER APPLICATION—

In Seed Furrow:

Apply up to 5 gallons per acre of a recommended Nutra-Flo PureGrade product.

- 6-24-6 or 3-18-18 are suggested because of their exceptionally low salt index.
- Do not dilute fertilizer with water when placing with the seed.

Place 2x2 or Surface Band:

Apply 4 to 10 gallons per acre of any Nutra-Flo PureGrade product.

- Use soil tests and yield goals to set rate.

Bed Placement:

Apply 4 to 10 gallons per acre of any Nutra-Flo PureGrade product. Higher rates may be safely used.

- Use soil tests and yield goals to set rate.
- Position the fertilizer band 1 to 3 inches below the beet seed.

—FERTIGATION—

Apply 2 to 4 gallons per acre of any Nutra-Flo PureGrade product twice during growing season.

- Apply 2 to 3 times midseason through a sprinkle or drip irrigation system.

—FOLIAR APPLICATION—

Apply 2 to 5 gallons per acre of any Nutra-Flo PureGrade product.

- Repeat 3 to 4 weeks after initial application.

*Contact Nutra-Flo® Company toll free at 800-831-4815 or visit our website at www.PureGrade.com for suggested programs on most crops.

MAXIMUM PLANT SAFETY

Nutra-Flo PureGrade Liquid Plant Food is safe for most applications.

- Apply in-furrow with seed, 2x2, surface band or bed placement.
- safe addition to foliar spray solutions

Always read and follow label directions.

GoldStart is a low-salt plant food high in orthophosphates. It is equal in performance to the Diamond product, but more economical. It can be foliar applied or placed in-furrow.

ADVANTAGES OF PUREGRADE FERTILIZER

- ✓ Low viscosity for uniform flow rates in cold temperatures.
- ✓ Virtually non-corrosive to mild steel. Application equipment lasts longer.
- ✓ True solution. Each drop has the same ratio of N, P & K.
- ✓ Low salt index for improved seed safety.
- ✓ High in orthophosphates for fast P utilization by young beet plants.
- ✓ May be used with compatible chemicals.
- ✓ Chelated micronutrients can be added as needed.
- ✓ Near neutral pH.

STARTER APPLIED

- Improved survivability of tiny beet plants from environmental stresses such as high winds and late spring freezing temperatures.
- Encourages early, uniform growth.
- Apply in-furrow with seed, 2x2, surface band or bed placement.
- Improved tonnage and sugar content.

100% NUTRIENT AVAILABILITY

9-18-9 3-18-18 10-10-10
5-15-15

100%
ORTHOPHOSPHATE

Crystal-clear, water-white plant food made from 100% orthophosphate. A more efficient process and direct distribution means high-quality Diamond grades are priced less than competitive products.

FOLIAR APPLIED

- Applies nutrients directly to foliage during critical growth stages.
- Treat in-season nutrient deficiencies promptly.
- Potential for higher yields.
- Apply with compatible chemicals.
- Use to supplement soil fertility program.
